

## Knovel

Knovel is an Engineering Village interactive database that is tailor-made for engineers; to assist with problem sets and to be used as a data processing tool.

It provides:

- » Trusted, citable and relevant answers.
- » Actionable data from data analysis tools.
- » Ease of sharing your work with a worldwide distribution team.

## Knovel Unique Features

- » **Material Property Search:** Build a precision query across hundreds of properties.

- » **Interactive Graphs:** Digitized for you to interpolate, or fully equation-based curves.

- » **Property Table Data:** Filter and sort to your precise needs.

- » **Equations:** Solve for any variable, hundreds of equations, every discipline.
